

In-Service Training

The Board of Education believes that the future of our community lies in our schools. The community needs schools that can give students the knowledge and information to meet the challenges of the future.

Expectations for educational performance have changed significantly in recent years. The demand today is for educational excellence, and good teaching is the key to this goal. Therefore, to meet the rising concerns the Board will provide a program of in-service training.

The Superintendent shall plan and present to the Board a program of in-service training that is consistent with the needs and goals of the district. The in-service training program shall be developed in consultation with appropriate staff members and shall include the demonstrable results by which the effectiveness of the program will be evaluated.

The Superintendent shall report periodically to the Board on the conduct of the in-service training program and the results of his/her evaluation.
